DIRECT U.S. GOVERNMENT & AGENCY OBLIGATIONS

This table shows the percentage of dividends (the amount reported in box 1a of Form 1099-DIV) attributable to direct U.S. government and agency obligations for each of the Northern Institutional Portfolios during 2019.

ALTERNATIVE MINIMUM TAX

The Tax Reform Act of 1986 requires that interest income from certain municipal obligations called “private activity bonds” be included as a tax preference item for the Alternative Minimum Tax (AMT) computation on your federal tax return. Form 1099-DIV (Box 12) reports the tax-exempt income that is subject to the AMT. The table below reports the percentage of tax-exempt income subject to the AMT.

PORTFOLIOS	AMT Percentage
Municipal	19.41%

PERCENTAGE OF EXEMPT INTEREST DIVIDENDS

The following table refers to the amount of dividends paid that may be excluded from gross income for federal income tax purposes. To determine the portion that may be excluded, multiply the percentage below by your total dividends received in 2019 as shown on your year-end statement.

Municipal	January - December	100.00%	—

TAX-EXEMPT INCOME EARNED BY STATE

Generally, the U.S. government does not impose federal income tax on interest income derived from municipal obligations. In addition, most states do not impose income tax on interest income derived from their own municipal obligations. This table shows the portion of dividends derived from interest income on state and local obligations on a state-by-state basis during 2019 for the Municipal Portfolio. Because tax laws vary among localities and states, we urge you to consult with your tax advisor about the specific rules in your respective state.
