PERFORMANCE DISCLOSURES

Returns for periods greater than one year are annualized. For Tiers that have less than 10 years of performance history, some returns may be modeled. For modeled returns, performance prior to the above Inception Date is based on the historical returns of the Hub fund, adjusted to reflect the fees and expenses of this tier. As further described in the Fund Declaration, this fund holds units of the Hub fund. Past performance is not indicative of future results. Net performance returns are reduced by investment management fees and other expenses relating to the management of the account. Index performance returns do not reflect any management fees, transaction costs or expenses. It is not possible to invest directly in any index. Investment management/advisory fees are described in Northern Trust Investments, Inc. (NTI) Form ADV Part 2A.

All securities investing and trading activities risk the loss of capital. There can be no assurance that any portfolio investment objectives will be achieved. Risk controls and models do not promise any level of performance or guarantee against loss of principal. No investment strategy or risk management technique can guarantee returns or eliminate risk in any market environment. Any discussion of risk management is intended to describe NTI's efforts to monitor and manage risk but does not imply low risk.

To comply with such regulations, plan sponsors will need to provide plan participants with additional information and should contact the plan administrator or plan record keeper regarding disclosure of total expenses to participants.

INVESTMENT RISKS

The following Risks are for Long Term Government Bond Index Fund - Non-Lending:

BOND RISK: Bond funds will tend to experience smaller fluctuations in value than stock funds.

CREDIT AND COUNTERPARTY RISK: The issuer or guarantor of a fixed-income security, counterparty to an OTC derivatives contract, or other borrower may not be able to make timely principal, interest, or settlement payments on an obligation.

INDEX FUND RISK: The performance of the Fund is expected to be lower than that of the Index because of Fund fees and expenses.

MORTGAGE-BACKED SECURITIES RISK: Mortgage-backed investments involve risk of loss due to prepayments and, like any bond, due to default.

DEFINITIONS

¹Bloomberg Long Government Bond Index The U.S. Long Government Index is comprised of the U.S. Long Treasury and U.S. Long Agency Indices. The U.S. Long Government Index includes Treasuries (public obligations of the U.S. Treasury that have remaining maturities of more than 10 years) and U.S. agency debentures (publicly issued debt of U.S. Government agencies, quasi-federal corporations, and corporate or foreign debt guaranteed by the U.S. Government) that have remaining maturities of more than 10 years. It is not possible to invest directly in an index.

Annualized Standard Deviation: Standard deviation is a measure of risk. In this case risk is represented by the fund's price movements up or down over time.

Information Ratio: Information ratio is a risk-adjusted measure of fund performance relative to benchmark performance. The information ratio is given by the ratio of the investment manager's active return to the active risk.

For more complete information concerning this Fund, including risks and expenses, please contact your relationship manager or call 877/651-9156 to request a copy of the most recent Annual Report and read it carefully before investing in the Fund.
